PROFESSIONAL SUMMARY

Dean's List Computer Science student with hands-on experience in business analysis, data validation, Power BI reporting, process documentation, and technical troubleshooting. Skilled in cleaning operational datasets, building Excel trackers, creating DAX measures, supporting QA/UAT-style validation, and translating business needs into actionable reporting insights. Experienced with Excel, Power BI, SQL, Jira, Confluence, Git/GitHub, and workflow documentation across business and technical environments. Strong communicator with a process-improvement mindset, eager to support RBC Insurance through data-driven solutions, control monitoring, stakeholder collaboration, and efficient delivery of business initiatives.

EDUCATION

Bachelor of Science, Computer Science
Lakehead University – Thunder Bay, ON

Sep 2023 - Present
GPA: 87.2

Coursework: **Database Systems, Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, Mobile Computing Technology, Big Data**

TECHNICAL SKILLS

- Business & System Analysis : Requirements gathering, process documentation, workflow analysis, stakeholder communication, process improvement, operational reporting
- Data & Reporting Tools : Microsoft Excel, Power BI, DAX, SQL, Microsoft Access, PowerPoint, Word, Outlook, data validation, data cleanup, dashboard development, KPI reporting
- Project & Collaboration Tools : Jira, Confluence, Git/GitHub, Visio, QA testing, defect tracking, UAT support
- Programming : Python, Java, C, C++, JavaScript, HTML5/CSS3
- Core Strengths : Analytical thinking, teamwork, collaboration, detail orientation, multitasking, time management, problem-solving, root cause analysis, client-focused communication

PROFESSIONAL WORK EXPERIENCE

Business Analyst Intern (Remote) | Ideas 4 Transformation Pvt Ltd

Feb 2026 – Present

- **Built** structured Excel trackers to support business research, competitor benchmarking, client records, and IT services analysis across service lines, pricing models, and market trends.
- **Cleaned and classified** operational datasets, including ticket exports, audit logs, and CSAT records, by fixing data types, handling nulls, and standardizing categories to improve reporting accuracy.
- **Developed Power BI** dashboards for MIS, CSAT, SLA, and audit reporting with KPIs, slicers, and drilldowns to monitor ticket volume, breach trends, audit scores, and customer feedback patterns.
- **Created** DAX measures to track compliance rates for priority justification, issue detail quality, resolution relevance, and user confirmation, identifying process gaps and control weaknesses.
- **Analyzed** ticket lifecycle performance by category and assignee, identifying breach/reopen drivers and translating findings into process improvement recommendations.

Founder/Technical Lead | Legacy Dials

Dec 2024 – Present

- **Built and maintained** 3+ operational trackers to manage customer records, documents, action items, follow-ups, ownership, and task status.
- **Created** process checklists to standardize daily operations, improve handoffs, and reduce duplicate work.

Teacher Assistant | Lakehead University | Thunder Bay, ON

Jan 2025 – Apr 2025

- **Supported** 70+ students with Windows setup, application configuration, and troubleshooting by explaining technical fixes in clear, user-friendly steps.
- **Created** quick-reference guides and setup checklists to standardize support procedures and reduce repeated setup issues.

Junior Developer | MET Educational Institute | Mumbai, India

Jun 2021 – Apr 2022

- **Executed** QA and UAT-style test cases for 2+ software modules, validating functionality, confirming expected system behaviour, and documenting defects before release.
- **Recorded** defects, test results, repro steps, and resolution notes to improve QA traceability and speed up issue resolution.
- **Gathered** staff requirements and translated business needs into scheduling and workflow system improvements.
- **Collaborated** with teammates to fix, re-test, troubleshoot, and document post-update validation results.

PROJECTS

COVID-19 Screening Mobile Application

- **Gathered** user requirements and built a Kotlin Android app to automate symptom screening and guidance.
- **Tested** usability and validated app functionality to improve accessibility, user experience, and reliability.

Operational Reporting & Ticket Analysis Dashboard | Power BI, Excel, DAX

- **Developed** Power BI dashboards using cleaned ticket, CSAT, and audit datasets to track SLA breaches, reopen trends, audit scores, and customer feedback patterns.
- **Created** DAX compliance measures to identify process gaps and reporting improvement opportunities.

LEADERSHIP & CERTIFICATIONS

- Logistics Head, MRV MUN Nation Club | MET Rishikul Vidyalaya
- Introduction to C & C++ | Lakehead University
- HTML & CSS Fundamentals | 30DaysCoding
